GREETINGS

Customers think,

'Can we keep the freshness of the food intact?'

'Is there a way to pack food simply, but neatly?'

BLT Co., Ltd. has been putting itself to our customer's shoes and has been sharing their needs.

And after putting sincere effort, we were able to come up with a fruit called 'Lofaho'.

BLT is a company that always thinks of customers and is with them.

BLT is an innovative food and vacuum packaging device that opens a new paradigm of food culture.

BLT is a company that creates a clean and safe kitchen culture.

BLT is a company that constantly aims for world's leading food and vacuum packaging device maker.

We will always think of customers first with a humble attitude.

We promise the best service based on trust.

We will continue to become a global top company that makes differentiated products.

CEO JOSEPH RIM

PRODUCT OVERVIEW

A little fresher, a little more convenient! Add technology to food packaging

Can you keep the original taste and freshness for a long time?

Can you pack food easily and conveniently and keep the remaining food hygienic and safe?

BLT presents a new paradigm of food packaging by putting full of care and thoughts.

3in1 food packaging without preheating
Innovative food sealer (IVP-1131)

It is economical to pack containers of various sizes immediately after power is supplied without preheating time. Depending on the type of food, it boasts a 3in1 function that can be container packaged as well as vacuum packaged, handheld and is free from harmful elements such as endocrine hormones.

BPA Free, reusable and variously sized sealing containers

Containers of 5 different sizes are economical because they can be washed and reused, unlike other products that are discarded after use. In addition, it is not harmful to the human body using polypropylene (PP) free of BPA.

Space utilization is great and also okay for microwave use!
Magic container sealer (IVP-1181)

You can simply pack any food and keep it fresh for a long time with a complete seal. Container structure allows it to be loaded in a refrigerator, so it has great space utilization and is safe from endocrine hormones, so it can be used in a microwave.

World's first coextrusion vacuum film for use in all vacuum sealer

It is the world's first co-extruded film for vacuum packaging and can be used in existing vacuum sealer and has excellent preservability. Unlike other companies, toluene is not used to adhere the film, so there is no need to worry about the remaining residue on the film.

BLT WAY

Creativity and challenge are the foundation for success! The world pays attention to BLT

We try to stay ahead of technology and are equipped with a challenging spirit that does not give up despite repeated failures!

We ventured into global markets, And have grown as a company that presents a new paradigm for food and vacuum packaging devices.
