Passed demanding electrical safety and specifications

Passed the product quality regulation system

European Union quality certification

Germany's demanding food products safety certification

Consumer safety use quality certification

3in1, container packaging and vacuum sealed packaging, handheld at once! Food packing machine IVP-1131

Have you ever been frustrated with long warm-up time?
Doing container packaging and vacuum packaging separately, is it uncomfortable?

A solution that will blow all this inconvenience in one shot!
It presents a new paradigm for food packaging.

Microwave and dishwasher usable

Ultra-low power consumption by packaging immediately after power supply

Electrical safety certification, electromagnetic safety certification

3in1 high efficiency!

It is the world's first practical new concept Innovative food sealer that can package all kinds of food.

- Container packaging: simple and convenient packaging of food, soup, salad, and rice for picnic or outdoor outing
- Vacuum Sealed Packaging: preserves fresh taste of food for a long time
- Handheld: maintaining freshness of food with vacuum hose

IVP-1131 Effect

| | |
|----------------------------|--|
| Container Packaging | <ul style="list-style-type: none"> · Can be used immediately after power supply without preheating time · Electricity savings by supplying power only when packaging containers · Can be reused after packaging due to low temperature adhesion (when using EPL film) · Almost no risk of electric burns with differentiated adhesive method |
| Vacuum Packaging | <ul style="list-style-type: none"> · Maintain the unique taste of food · Preservation of freshness of meat and fish for a long time · Dry food, coffee, powdered milk, flour, sugar, etc. · Prevents odor and microbial propagation due to food spoilage |
| Handheld | <ul style="list-style-type: none"> · Transformed into a vacuum sealed mixer using a handy hose · Prevent browning of apples, potatoes, tomatoes, etc. · Maintain freshness of the remaining sauce using a vacuum hose · Vacuum zipper bags for convenient food packaging |

Specification

Reusable, safe sealing container in the microwave

Why use 'Lofaho' containers?

Reusable, safe sealing container for microwave/dishwashers

A new revolution created by your curiosity!
You can now find reusable sealing containers.

Reusability makes it economical

It is economical because it can be easily and neatly peeled off by using EPL sealing film, so it can be washed and used multiple times, unlike other industrial container sealers.

Wide selection of sizes

You can customize the container according to the type or amount of food in various sizes.

| | |
|----------|--------------------|
| Size | 6.88 X 4.72 inch |
| Capacity | 1.18inch (10oz), |
| | 1.57inch (17oz), |
| | 2.16inch (23.6oz), |
| | 2.95inch (3.8oz), |
| | 3.74inch (47.3oz) |

BPA Free

Safe polypropylene (PP), which is free of BPA and can be used in microwaves and dishwashers.

Cleanliness for easy checking of content and the day of storage

Corners of your fridge are neatly arranged, you can easily find the food you need, and you can stack them as well.

- It can be loaded, so it tidies up your fridge.

Biodegradable eco-friendly products

Environmentally friendly biodegradable container product developed and completed with technology (separate order)

| Recommended Packaging | Dry side dishes etc. | Liquid food |
| Size | 5.9in X 49ft | 5.9in X 65ft |
| Capacity | Around 80 containers | Around 100 containers |

'Lofaho' vacuum film used in existing vacuum seal packaging machines!

Can it be used in the existing vacuum sealer? Is there any vacuum film free from BPA?

It can also be used in existing vacuum sealer as you wish.
The world's first coextrusion method is applied to reduce the risk of harmful substances.

Reusability makes it economical

This is the world's first air channel type co-extruded vacuum film, so you don't have to worry about food leaks and has excellent oxygen barrier, so you can store food for a long time without smell, discoloration or spoilage.

- Air Channel : A method of forming a fine derivation pattern on the surface of the film so that air is discharged smoothly and quickly during vacuum seal.
- Co-extrusion Film : Two or more raw materials are melted in different extruders, stacked in multiple layers, and filmed in various ways

NO EA (Ethyl Acetate), BPA Free!

Unlike other companies that usually apply dry lamination, 'Lofaho' applies a coextrusion method so you don't have to worry about harmful components (toluene chemical solvents) remaining on the film. It can be used safely in the microwave.

Product specification

| | Shape | Roll Type | Pouch Type |
|----------------|-----------|----------------|-----------------------------|
| Characteristic | | Cut as wanted | A bag made with vacuum seal |
| Size | 11 inches | 11 inch X 16ft | 11 inch X 12 inch |
| | 8 inches | 8 inch X 20ft | 8 inch X 11 inch |
| | 6 inches | 6 inch X 20ft | 6 inch X 9 inch |

It can be used in any vacuum seal packaging machine!
Efficient use of space in the fridge thanks to complete compression!

Excellent preservation by applying the world's first coextrusion method

Zero BPA for human body

Can be used with all existing vacuum seal packaging machines

Maintain at least 3 times freshness compared to normal film packaging
